TITLE PAGE

- Title of the manuscript;
- Title, Full names, affiliation and addresses of all authors including full postal address, and email addresses;

- Suggestions for a short running title of no more than 40 characters;
- Acknowledgements of financial or research assistance.

ABSTRACT

- Manuscript should contain abstract of up to 150 to 250 words in length. Please be sure that the abstract page does not contain any information that could identify the author(s).

Please do not put reference citations in the abstract. Also, please take care to create a title and an abstract that are direct and 'reader-friendly'.

KEYWORDS:

- Authors should choose 6 to 10 keywords related to the research topic.

BODY OF THE ARTICLE

- The introduction should state clearly the objective of the paper as well as the motivation and context of the research. The literature review should be limited to the articles, books and other items that have a direct bearing on the topic being addressed. Theoretical papers may devote a full section to motivation and potential usefulness of the proposed theoretical

framework. The empirical section should provide appropriate citations to the statistical methodology used and a complete explanation only if the methodology is new. Full details of the statistical analyses and results must be included in the paper itself. The conclusion should summarize key findings and state their importance to the field.

PRESENTATION STYLE

- Margins should be one inch (2.5cm) at the top, bottom, and sides of the page.
- Font type should be 11-point Times Roman throughout the document.
- Double-space all body text, including abstract, references, endnotes and appendices.
- Number all pages in your manuscript, starting with the Abstract Page.
- Use one space, not two spaces, between sentences.
- Manuscript text should be justified.

- Use three levels of headings. Main headings designate your major sections. Center main headings and use all capitals. Second-level headings should be flush with the left margin, and only the first letter of major words should be capitalized. Third-level headings should be indented and italicized; begin the first word with a capital, end the heading with a period, and then continue with your text. Do not use a fourth-level of headings.

EQUATIONS

-

Please do not save and submit any equations in "images" format because we cannot edit them. If

you cannot write them originally in Word, then use the tool which can be located at

This tool is very easy to use and will solve all the problems. Displayed equations are double

numbered by Article, in parentheses. Variables are italicized in the equations and in the text

PERMISSION TO USE FIGURES

- It is critically important to ask for permission to reuse figures from the copyright holder when you are writing the Article. Do not wait until you have submitted the manuscript to the editor or

the publisher. If payment is required it is your responsibility to process that. Alternatively, you can seek a replacement figure. The permission citation should form part of the figure caption.

FIGURE RESOLUTION

- At all times, figure resolution needs to be 600 dpi at the size it will be used. (Keep in mind that large figures will need to be downsized by our typesetter.) The exceptions are line art, which should be 800 dpi at the size it will be used, and

grey scale charts and photos, which should be 400 dpi at the size they will be used. Figures downloaded from the Internet are generally not of good quality.

REFERENCES

References should be written in the (API and Other international Standards as per Subject) following style:

https://www.youtube.com/watch?v=CnVq_BpwP2E

- Authors should make certain that the reference for each citation in the text is complete, and that

the cited dates and the spellings of the authors' names in the text and references are in agreement. Include full page range for all journal references and book Article. Include both the volume and issue (number [if applicable], season, month, or date) for journal/periodical references.
